	SUBJECT: Report on Information Gaps Relative to the FY 1988 National Intelligence Topics (NITs) of Current Interest		
	convinced that the identified gaps are exclusively the result of collection shortfalls, and it will accordingly be working with production and collection organizations as well as with groups representing the analysts in order to get to the root of the problems. In particular, the Staff will assess the gaps data (Attachment B) by focusing on those gaps that persist from year to year, considering their priorities, and working with the DCI's collection and production committees to develop pro-active, constructive measures to eliminate or reduce those gaps. We will keep you advised of our progress in subsequent reports.		25X
